

QUALITY POLICY

The Management of REVIFA SPA undertakes to apply the Quality Policy, hereinafter defined, complying with the National and Community laws and Regulations in terms of environmental protection and considering it essential to know and keep under control all the factors that directly and indirectly influence the quality of the products and services offered.

This Policy is applied to the activities of "Manufacturing of screws and bolts through machining and assembly on customer's drawing".

The Management considers the following activities to be fundamental:

- implement and maintain a Quality Management System in compliance with IATF 16949: 2016
- transmit to the customer and all the relevant stakeholders the safety and trust that the company meets their needs over time
- set up your work programs in line with the requirements of the Quality System and agreed with the customer
- perform maintenance and continuous improvement of plants and production systems, in order to allow the product and production process to be adapted to the quality levels required by the market
- promote the involvement of all the sectors involved in the Quality Management System and relevant environmental issues
- maintain the level of professionalism of the personnel appropriate to the task assigned
- introduce useful indicators for the objective assessment of the adequacy and effectiveness of the Quality System through the periodic Management Review to achieve the objectives set in the Improvement Plan
- maintain control and monitoring of the effects of ongoing activities on the environment and on the health and safety conditions of workers
- evaluate in advance the environmental impact and possible risks to the health and safety of workers in relation to new products and new processes
- maintaining the continuous commitment towards the improvement and prevention of pollution
- maintaining continuous commitment to optimizing the use of natural resources
- maintain the commitment to dialogue and cooperation with the responsible control and oversight bodies
- ensure that the Policy is communicated and understood by all the interested parties identified by the organization, applied at all company levels and available to the interested parties on the company website
- manage changes in activities and / or processes in order to minimize the associated risks

The Quality Policy therefore proposes the following objectives:

- maintaining the compliance of the Quality Management System with the requirements of the IATF 16949: 2016 standard promoting continuous improvement and making available all the resources necessary for the realization of the System itself, verifying periodically adequate and effective;
- continuous updating of technological know-how through specialized magazines, meetings with manufacturers and producers
- monitoring of suppliers in order to guarantee the quality of the products and services purchased, maintaining mutually beneficial relationships with them to ensure their involvement in the application of this Policy
- maintaining the correspondence of the product / service offered to the maximum quality requirements expected by the customer, taking into account the quality / price ratio through the involvement of suppliers and internal staff
- support the function of the Quality System Manager to ensure continuity of actions aimed at improving company performance;
- maintain the safety standards of the machines with adaptation to the CE mark

- identify, code and analyze internal and external defects, including those identified in the supplies, to monitor them and promote corrective actions aimed at reducing them
- maintain staff training in line with company needs and the requirements of current legislation
- activate a system of continuous improvement of the corporate image through improvements to be made to the company itself and periodic analyzes on the degree of customer satisfaction
- responsibly manage their business processes to keep them under control, eliminating, where possible, and minimizing any significant risk of accidents, in accordance with the current state of technological knowledge as economically viable and in the logic of continuous improvement.

REVIFA SPA has identified the external and internal factors that are relevant for its strategic aims and directions and which influence its ability to achieve the expected results for its Quality Management System.

The analysis of the context is checked periodically and updated following the change in the factors analyzed, including the evaluation of the risks / opportunities associated with them.
